

Access a Tree Using a Rope and Harness and Aerial Tree Rescue

Operations

Course Details

Title: Access a Tree Using a Rope and Harness and Aerial Tree Rescue Operations

Type: Training Course

Duration: 5 Days

The Access a Tree Using a Rope and Harness and Aerial Tree Rescue Operations training course combines the knowledge and skills to access a tree using a rope and harness and those required to carry out tree rescue operations.

Covering the essential safety guidelines, equipment, inspection and planning needed to access a tree and carry out a successful rescue, this training could help you save lives.

This training can lead you onto the Level 2 Award in Accessing a Tree Using a Rope and Harness or to the Level 3 Award in Aerial Tree Rescue Operations.

Who is it for?

This course is for people who are already working in, or are looking to work in, one of the following industries:

Arboriculture

Forestry

Woodland industries

Local authorities

Conservation

Please be aware that to take this course, you must be physically fit and not suffering from vertigo or similar conditions. You must also be free from medication that could affect your safety. Also, there may be pre-requisite training and/or assessment required before undertaking this training course. Learners should seek advice from their training provider.

This course is not appropriate for persons under 16 years of age.
