

The Safe Use of Aluminium Phosphide for Vertebrate Pest Control

Course Details

- Title: The Safe Use of Aluminium Phosphide for Vertebrate Pest Control
- Type: Training Course
- Duration: 1 Day

Our Safe Use of Aluminium Phosphide for Vertebrate Pest Control comprehensive training course has been developed in conjunction with industry and RAMPS (UK) to ensure users of Aluminium Phosphide are adequately trained. Aluminium Phosphide is a dangerous compound which used incorrectly can be hazardous to the health and safety of users, the general public and non-target animals, therefore it is essential that people are trained properly in the safe use of aluminium phosphide.

The training will provide a full working knowledge of commercial products and application equipment to be able to plan, implement and monitor a control programme appropriate to the situation using efficient and safe methods with regard to the environment.

On completion of the training you will be able to recognise the symptoms of phosphine poisoning, be able to apply technical and operational controls to avoid exposure, be able to identify target animals and undertake a survey to determine their presence, interpret product labels, know how to apply a treatment safely and effectively and retain appropriate records.

The training is ideal for pest control operatives, game keepers, people working in agriculture, horticulture and conservation.

On completion of the training you will receive a certificate of attendance providing you with the performance criteria to complete the Lantra Awards Level 2 Award in the Safe Use of Aluminium Phosphide for Vertebrate Pest Control licence to practice.

This training course attracts 12 Basis CPD points.

Who is it for?

Our comprehensive training is aimed at anyone who wishes to control vertebrates using aluminium phosphide in a commercial environment and is suitable for pest control operatives, farmers, gamekeepers and greenkeepers.

What will you get from it?

Completing the training will provide learners with knowledge and practical experience to store, transport and apply aluminium phosphide against vertebrate pests with minimum risk to themselves, colleagues, the general public and non target animals. The course will prepare learners for the mandatory Lantra Awards Level 2 Award in The Safe Use of Aluminium Phosphide for Vertebrate Pest Control.

The things you need to know:

Duration: 1 Day

Delivery method: Classroom/Practical

Max no of learners: 8
